

EXP 12: CHANGE HARDWARE COMPATIBILITY OF A VM (EITHER BY CLONE/CREATE NEW ONE) WHICH IS ALREADY CREATED AND CONFIGURED.

DATE: 1-10-2025

AIM:

To Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured.

PROCEDURE:

Step 1: Open VMware Workstation.

Step 2: Right-click the existing virtual machine and go to Manage → Change Hardware Compatibility.

Step 3: Select the desired VMware Workstation hardware compatibility version and click Next.

Step 4: Choose whether to create a clone of the VM with the new compatibility or apply directly to the current VM.

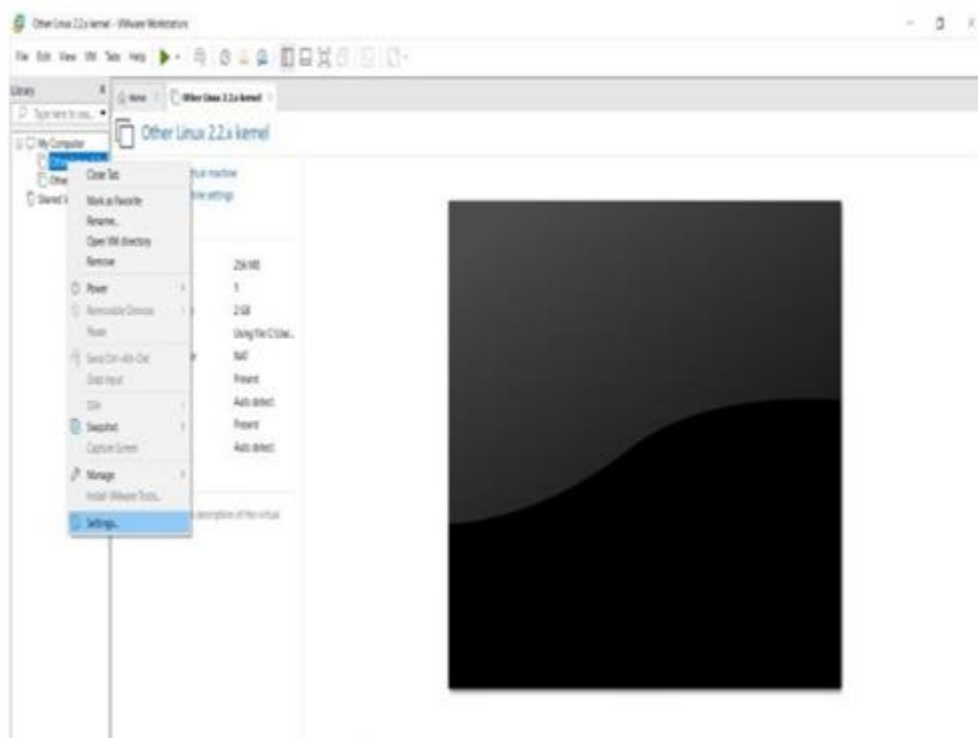

Step 5: Review the settings, then click Finish to apply changes.

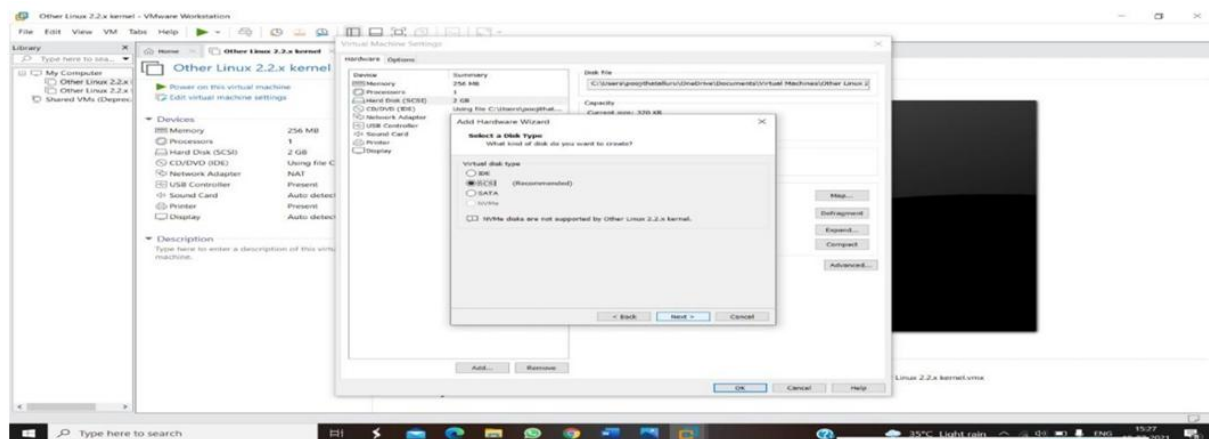

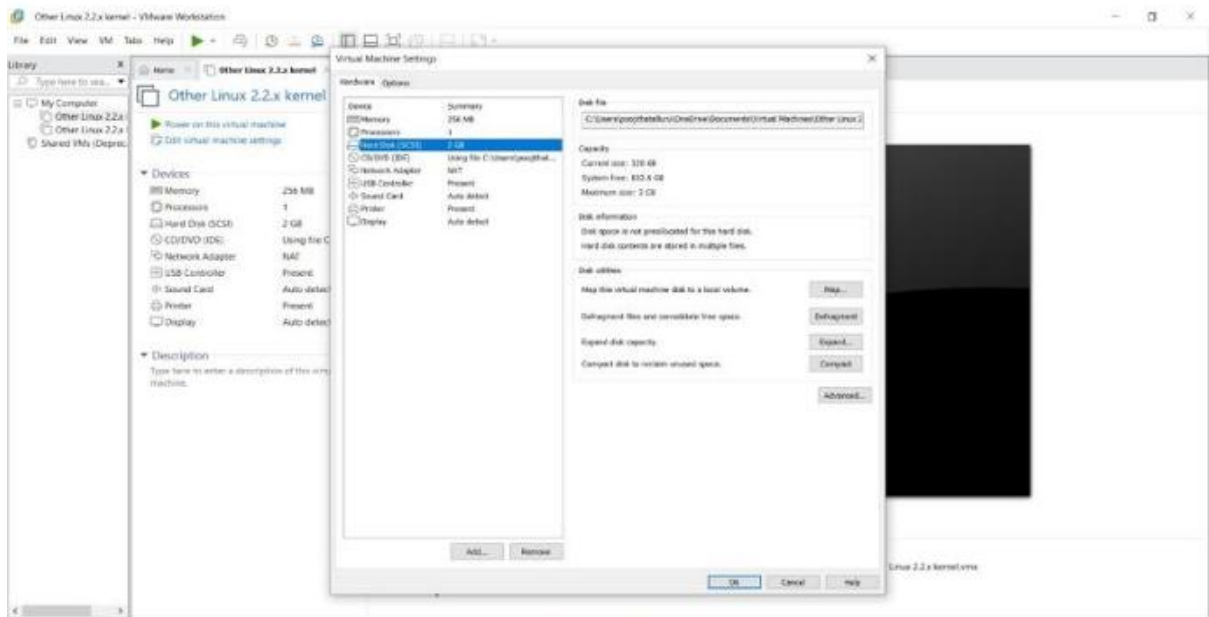

Step 6: Alternatively, go to VM Settings → Add Hardware Wizard → Add a new virtual component (e.g., new SCSI virtual disk, network adapter, or additional CPU/RAM).

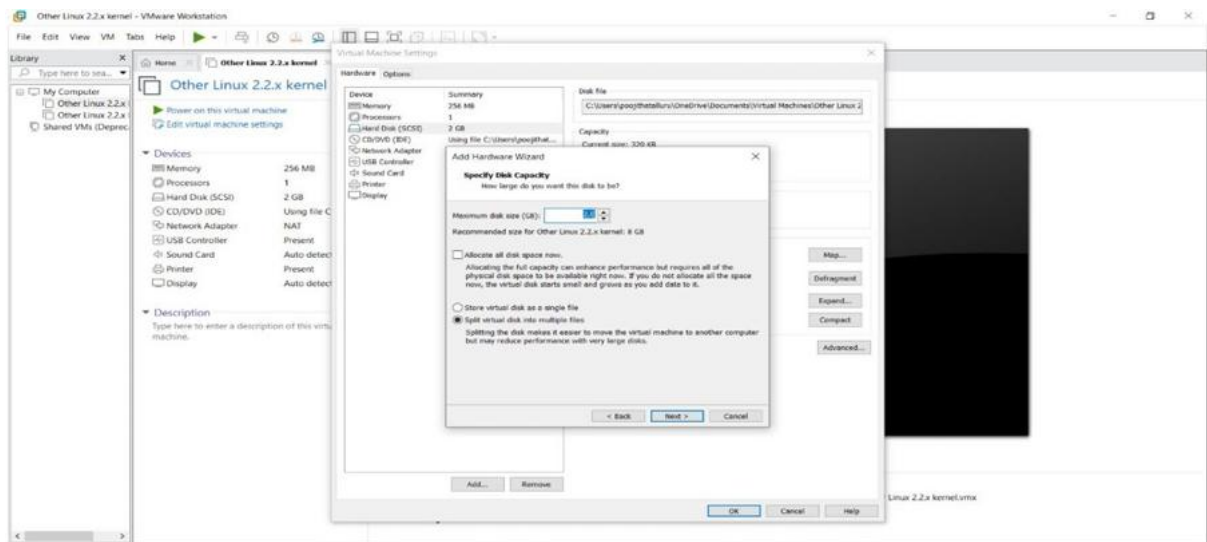

Step 7: Configure the hardware (e.g., disk size 2 GB, split into multiple files, etc.) and save the settings.

Step 8: Power on the VM and verify it runs with the updated hardware compatibility.

IMPLEMENTATION :

RESULT:

The hardware compatibility of the VM was successfully modified using VMware Workstation, demonstrating the ability to upgrade or adjust VM hardware resources for better performance or compatibility.
