

EXPNO 11: CREATE A CLONING OF A VM AND TEST IT BY LOADING THE PREVIOUS VERSION/CLONED VM.

DATE: 1-10-2025

AIM:

To create a cloning of a vm and test it by loading the previous version/cloned vm.

PROCEDURE:

Step 1: Open VMware Workstation.

Step 2: Select the VM → go to Manage → Clone.

Step 3: In the Clone Wizard, click Next.

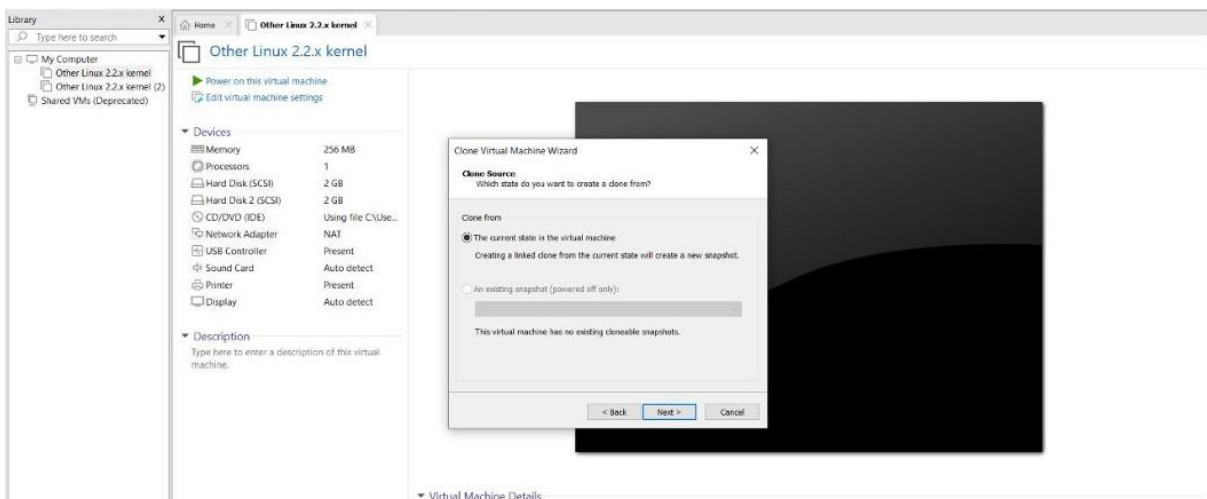

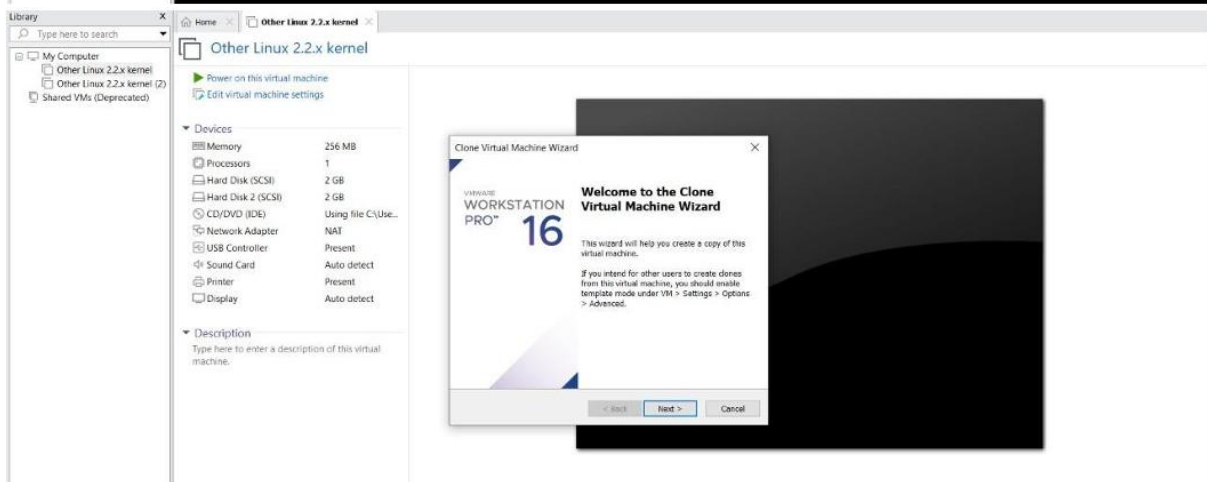

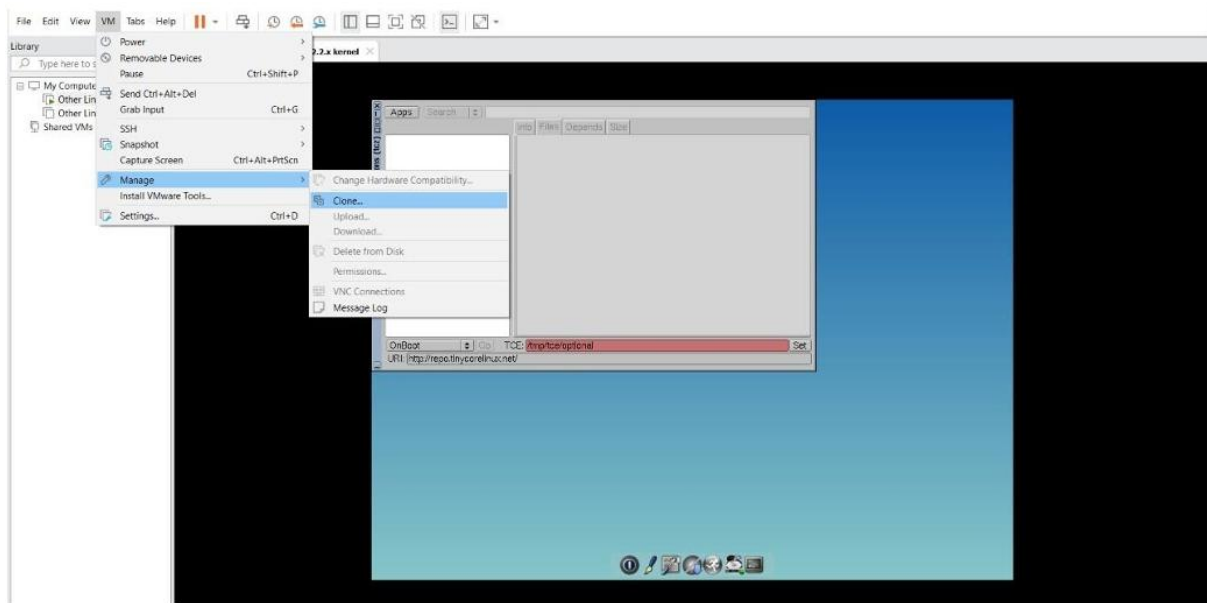

Step 4: Choose the snapshot or current state of the VM to clone.

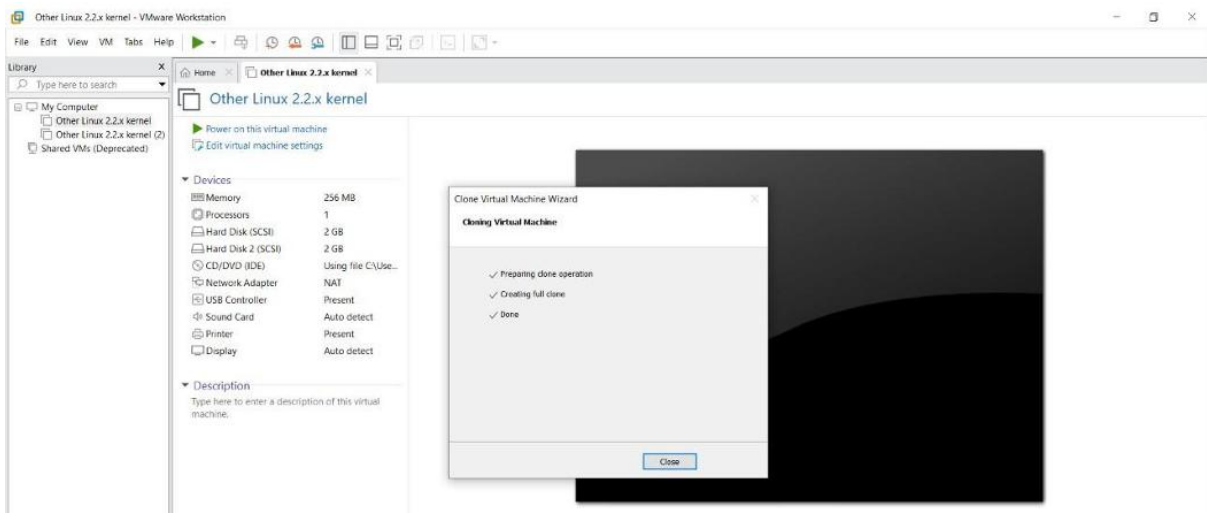

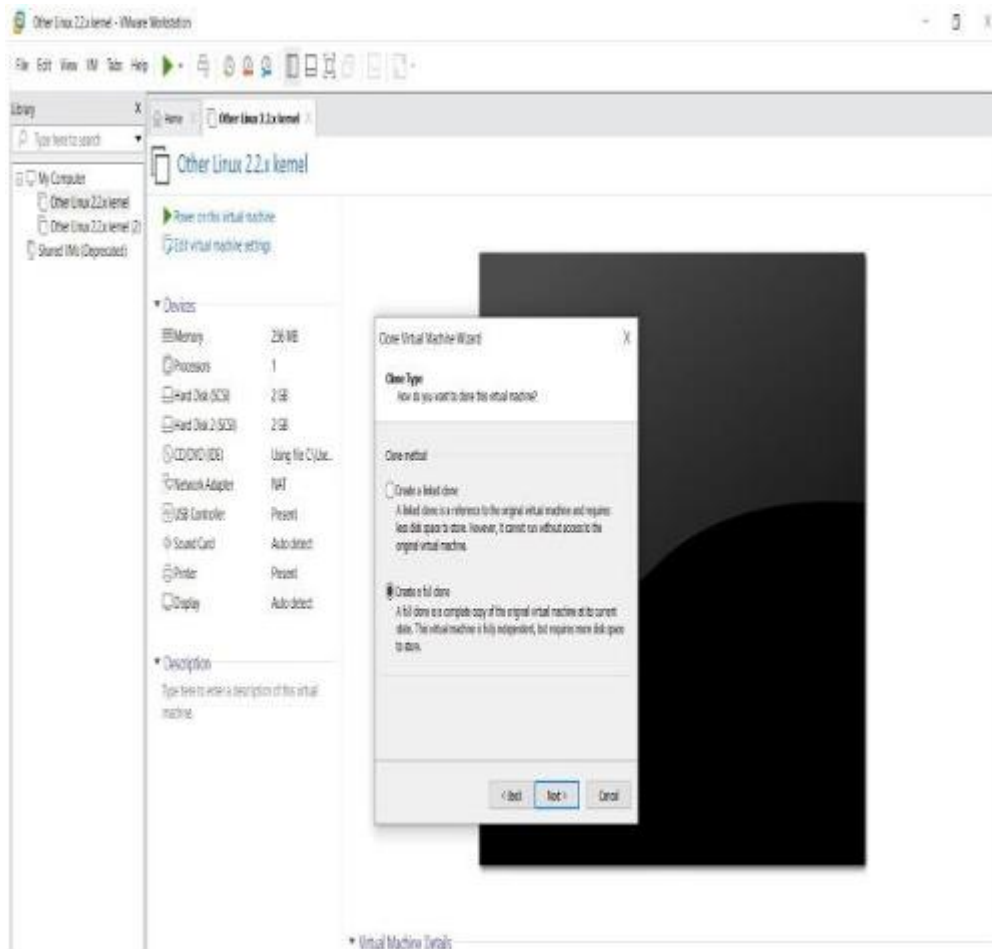

Step 5: Select Full Clone (creates an independent copy of the VM).

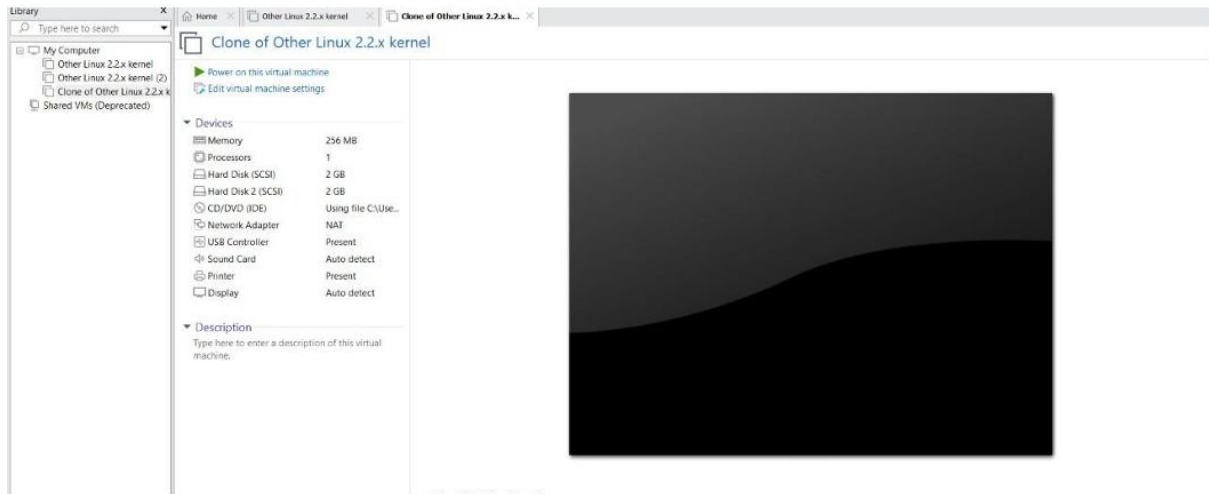

Step 6: Provide a name and location for the cloned VM and click Finish.

Step 7: After cloning, power on the cloned VM and verify it runs as an independent virtual machine.

IMPLEMENTATION :

RESULT :

A cloned VM was successfully created and tested using VMware Workstation. The cloned VM ran independently, demonstrating the concept of VM cloning and backup/recovery.
